B-5 Add Material/Technique Control Information

Starting point:
Identification & Description Module

Add information by using the Material Thesauri (controlled input):

1. Select specific material information from the thesauri

2. Modify the indexed material information within an individual context (e.g. Exhibition display), without losing index information

Modified, but indexed information has been added to the Artefact

Function:
Controlled research & input

Material Information by index
Wood, Paint

Labeling for exhibition display
