B-6 Add / Create New Location Information

Starting point:
Location & Exhibition History Module

Add a new location by using the Location Archive
(controlled input):

New Location has been added

1. Search the location from
the location archive

2. If there is no search result available,
a new location record can be added.
Location details can be refined by
adding thesauri based location data
or additional location information
(e.g. architectural maps)
